Art Unit: 3736

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, 20-28, 31-34, drawn to an implantable hearing device and method of use, classified in class 600, subclass 25.
  - II. Claims 16-19 and 29-30, drawn to a method of manufacturing a hearing device, classified in class 29, subclass 592+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as making the device without connecting an amplifier and/or using only one transducer.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3736

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Lacyk whose telephone number is (703) 308-2995.
